Artwork Description

The Company of Frans Banning Cocq and Willem van Ruytenburch, known as the 'Night Watch'

Rate it Add to tour Include in results

Description

The Night Watch, the most famous painting in the Rijksmuseum, actually has another title: the 'Company of Frans Banning Cocq and Willem van Ruytenburch'. The picture is a militia painting: a group portrait of a division of the civic guard. Rembrandt depicted the group of militiamen in an original way. He did not paint them in neat row or sitting at their annual banquet, rather, he recorded a moment: a group of militiamen have just moved into action and are about to march off.

Approach

- Making museum metadata available in RDF/OWL
- Making relevant vocabularies available in RDF/OWL
- Aligning & enriching vocabularies/metadata
- Using resulting RDF/OWL graph for building a combined (virtual and physical) user model
- Using the above results for (semi)automatic generation of virtual and physical museum tours

The Semantic Web = Web with a meaning

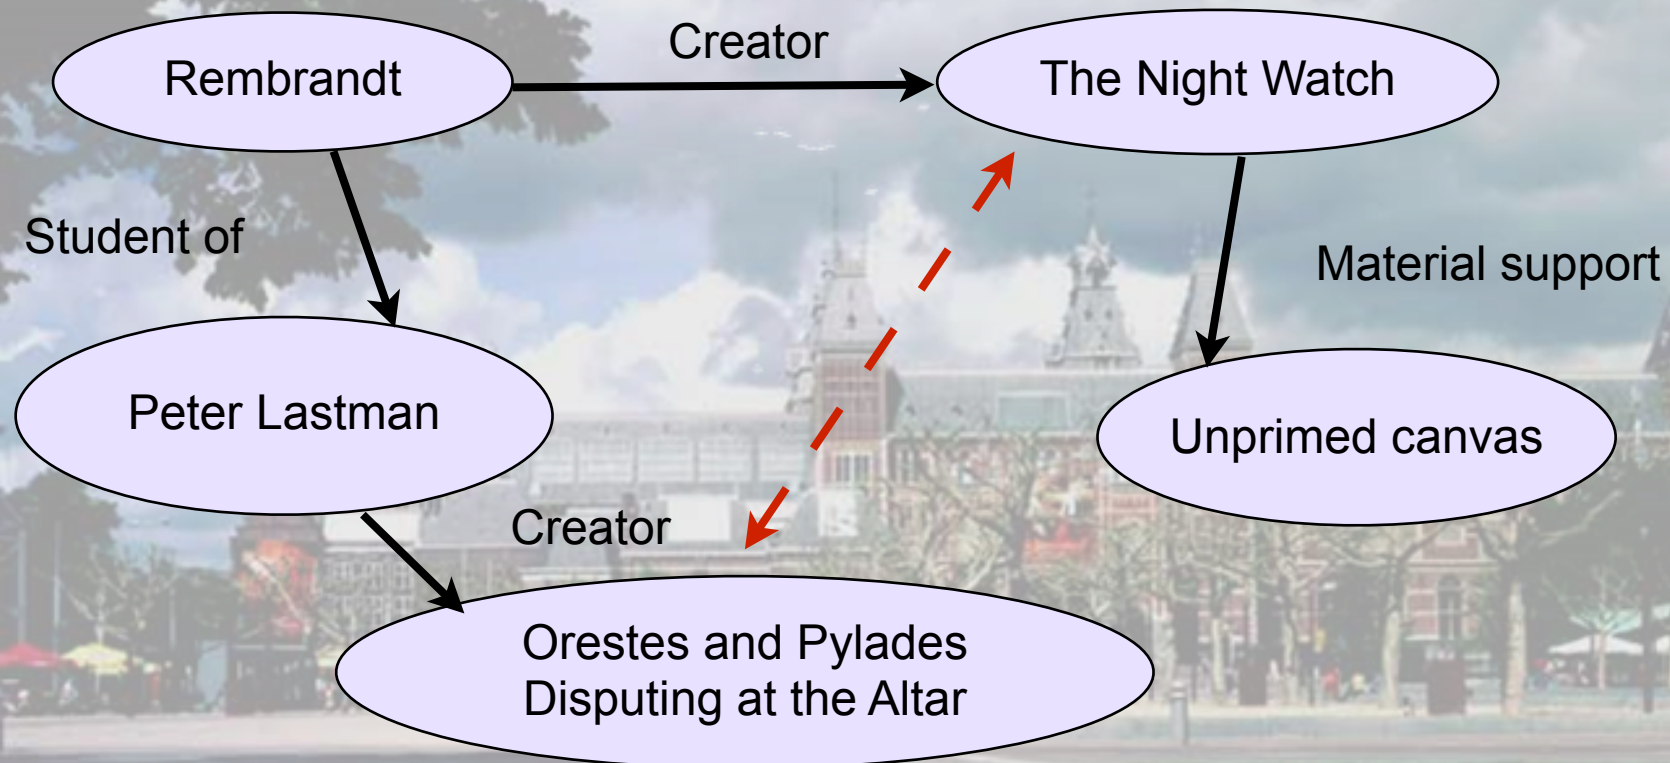

"If HTML and the Web made all the online documents look like one huge book, RDF, schema, and inference languages will make all the data in the world look like one huge database"

Tim Berners-Lee, Weaving the Web, 1999
