Abstract

This document is the user manual for the QIS system. This program is part of the Software Engineering Project (2IP35) at Eindhoven University of Technology.

The document complies with the Software User Manual (SUM) from the Software Engineering Standard, as set by the European Space Agency[1].

Chapter 1

Introduction

1.1 Intended readership

This document is intended for all users of QIS.

1.2 Applicability

This Software User Manual (SUM) applies to the latest release (as of 2010-01-11) of QIS.

1.3 Purpose

The purpose of the system is, as stated in the URD [3], to support workload division within the department and to support various parties regarding the management of working hours and tasks, holidays, courses and employees.

The purpose of this software user manual is to describe the functionality of the system and explain to the end user how to use it. It is divided into sections for different types of end users.

1.6 How to use this document

Chapter 3 contains tutorials for all operations supported by QIS.

1.7 Related documents

URD The User Requirements Document for the QIS project.

1.8 Conventions

*italics* Words in *italics* are text you'll find on screen

1.9 Problem reporting

Since Group QIS will be dissolved after completion of the QIS project, problem solving is not our responsibility. However for 3 months after completion of the project problems can be reported to sep@tnode.net.
Chapter 2

Overview

QIS is an application designed and developed by Group QIS for the Department of Mathematics and Computer Science at the Eindhoven University of Technology. The purpose of the application is to support workload division within the department and to support various parties regarding the management of working hours and tasks, holidays, courses and employees.
Chapter 3

Tutorial

This section contains tutorials for performing all actions and operations supported by QIS. They are grouped by the screens on which you can perform these actions. A screen can only be seen by people with certain rights. To ease the search for related actions, the tutorials are grouped by the rights as mentioned in the URD [3].

3.1 Installation

Functional description

This tutorial describes how to prepare and perform an installation of QIS to a webserver.

Procedures

1. Ensure that your working environment is a shell running on the server.
2. Navigate to an empty folder on the server where you’d like to place the application.
3. Ensure that this folder is writable by the current user.
4. Copy all files from the deliverable release folder to the current folder.
5. Ensure that a Python interpreter (2.4 ≤ version < 3) is installed on the server, including all required dependencies as listed in the STD [2] section 2.1. This interpreter must be used both for executing mentioned scripts and for executing the web application.
6. Ensure that Django version 1.1.1 or higher is installed on the server.
7. From the qis/tools folder, run the setup.py script, answering all questions asked.
8. Repeat the setup process in case of failure or when unintentional settings surface.
9. Ensure that all files and folders from the application cannot be written to by the user from whose account the application will run, as well as any underprivileged users.
10. Ensure that these files can be read by the user from whose account the application will run, preferably by no-one else.

11. Ensure that a database is accessible via the settings passed to the setup.py script.

12. Ensure that a webserver is configured to serve requests to /media/* statically from the folder qis/media/, and that the webserver has permissions to read this folder.

13. Ensure that a webserver is configured to call the WSGI application qis/wsgi/qis_prod.wsgi for requests to / on a host.

14. Note (one of) the root URLs the webserver is configured to listen on for requests to this application.

15. Start or reload the webserver.

16. Visit the noted URL via a browser.

The following results should be observed:

- The execution of setup.py reports success.
- The browser displays an authentication page.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.2 Log in

Functional description

This tutorial describes how to log in to QIS. This is the same for all groups of users.

Cautions and warnings

- You must be in the possession of valid credentials to be able to log in to QIS.

Procedures

1. Use a web browser to enter the website of your QIS installation. Your administrator should know this address. Typically, it starts with "http://www.".

2. When presented with a login form, please provide your username and password. In some organizations these are the same as the global organizational login data.

3. Click Log in.
Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

### 3.3 Log out

**Functional description**

This tutorial describes how to log out of QIS.

**Cautions and warnings**

- You must be logged into QIS before you can log out.
- Any unsaved changes are lost when logging out.

**Procedures**

1. From any screen within QIS, click on Log out at the right of the menu bar.

### 3.4 Edit details

**Functional description**

This tutorial describes how to edit your personal details and preferences in QIS.

**Cautions and warnings**

- You must be logged in. See section 3.2

**Procedures**

1. Click on the QIS logo.
2. Click on the Edit details button.
3. Edit the information you wish to modify.
4. Click Save.
Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.5 View courses related to you

Functional description

This tutorial describes how to view the report about course information related to you.

Cautions and warnings

- You must be logged in. See section 3.2

Procedures

1. Click on the QIS logo.
2. Click on the View workload related to own course instances button.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.6 Add employee

Functional description

This tutorial describes how to add employees to QIS.

Cautions and warnings

- You must be logged in with an account that has administrator or modify subdepartment workload rights. See section 3.2
- The user name of an employee has to be unique. Not all occupied names need to be visible to you, but QIS will give a warning when you choose an already occupied name.
Procedures

1. Select Employees from the menu bar.
2. Click on Add employee in the top right corner, just below the menu bar.
3. Fill in all necessary fields under Personal information.
   - An email address is used to send notifications to the employee, whenever something interesting changes.
   - Please mind the cautions regarding user name.
4. Click Save

For adding an employment to an employee, please refer to section 3.9.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

3.7 Edit employee

Functional description

This tutorial describes how to edit employees in QIS.

Cautions and warnings

- You must be logged in with an account that has administrator or modify subdepartment workload rights. See section 3.2

Procedures

1. Select Employees from the menu bar.
2. Locate the employee you wish to edit in the employee overview and click on that row.
3. Edit the information you wish to modify.
4. Click Save.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.
3.8 Remove employee

Functional description

This tutorial describes how to remove employees from QIS.

Cautions and warnings

• You must be logged in with an account that has administrator or modify subdepartment workload rights. See section 3.2.

Procedures

1. Select Employees from the menu bar.
2. Locate the employee you wish to delete in the employee overview and click on that row.
3. Click Delete in the bottom left corner.

For removing an employment from an employee, please refer to section 3.11.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.9 Add employment

Functional description

This tutorial describes how to add employments to employees in QIS.

Cautions and warnings

• You must be logged in with an account that has modify subdepartment workload rights. See section 3.2.

Procedures

1. Select Employees from the menu bar.
2. Locate the employee you wish to add an employment to in the employee overview and click on that row.
3. Fill in all necessary fields under Employments. If there is already an employment attached to this employee scroll down to the empty employment at the bottom of this section.

4. Click Save

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.10 Edit employment

Functional description

This tutorial describes how to edit employments in QIS.

Cautions and warnings

- You must be logged in with an account that has administrator or modify subdepartment workload rights. See section 3.2

Procedures

1. Select Employees from the menu bar.
2. Locate the employee whose employments you wish to edit in the employee overview and click on that row.
3. Edit the employments you wish to modify.
4. Click Save.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.11 Remove employment

Functional description

This tutorial describes how to remove employments from employees in QIS.
Cautions and warnings

- You must be logged in with an account that has *modify subdepartment workload* rights. See section 3.2.

Procedures

1. Select *Employees* from the menu bar.
2. Locate the employee you wish to remove an employment from in the employee overview and click on that row.
3. Check the box marked delete in the top right corner of the employment in the *Employments* section.
4. Click *Save*

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.12 Add assignment

Functional description

This tutorial describes how to assign employees to tasks in QIS.

Cautions and warnings

- You must be logged in with an account that has *modify subdepartment workload* rights. See section 3.2.

* These assignments are on a provisional basis. To make them definitive refer to section 3.15.

Procedures

There are two ways in which tasks are assigned to employees: originating from the employee and originating from the task itself.
Employee

1. Select Employees from the menu bar.
2. Locate the employee you wish to assign a task to in the list.
3. Locate the employment you wish to register the assignment under and click under Position.
4. Click on the appropriate Assign ... task button.
5. Fill in the required information.
6. Click Save.

Task

Course related

1. Select Courses from the menu bar.
2. Locate the course instance to which the task belongs that you wish to assign.
3. Click under Periods.
4. Locate the task you wish to assign and click at the right side of that row.
5. Fill in the required information.
6. Click Save.

Non-course related

1. Select Tasks from the menu bar.
2. Locate the task you wish to assign and click at the right side of that row.
3. Fill in the required information.
4. Click Save.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

3.13 Edit assignment

Functional description

This tutorial describes how to edit assignments in QIS.
Cautions and warnings

- You must be logged in with an account that has modify subdepartment workload rights. See section 3.2.
- These modifications to assignments are on a provisional basis. To make them definitive refer to section 3.15.

Procedures

1. Select Employees from the menu bar.
2. Locate the employee for whom you wish to edit the assignments.
3. Locate the employment to which the task was assigned and click under Position.
4. Locate the task you wish to edit and click on the left side of the row.
5. Edit the information you wish to modify.
6. Click Save.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.14 Remove assignment

Functional description

This tutorial describes how to remove assignments in QIS.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment workload rights. See section 3.2.
- These modifications of the assignments are on a provisional basis. To make them definitive refer to section 3.15.

Procedures

1. Select Employees from the menu bar.
2. Locate the employee from whom you wish to remove the assignments.
3. Locate the employment to which the task was assigned and click ▼ under Position.
4. Locate the task you wish to remove and click ✗ on the left side of the row.
5. Click Yes, I’m sure.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

3.15 Make assignments definitive

Functional description

This tutorial describes how to make assignments definitive in QIS.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment workload rights.
  See section 3.2

Procedures

1. Select either Employees, Courses or Tasks from the menu bar.
2. Click Assignments definitive.
3. Click Yes, I’m sure.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

3.16 Fill up research hours

Functional description

This tutorial describes how to automatically assign hours to a research project in QIS.
Cautions and warnings

- You must be logged in with an account that has *modify subdepartment workload* rights. See section 3.2.

- This will only work for the employees that have only one research project assigned to them.

Procedures

1. Select either *Employees*.
2. Click *Fill all research hours*.
3. Click *Ok*.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

### 3.17 Add course

**Functional description**

This tutorial describes how to add courses in QIS.

**Cautions and warnings**

- You must be logged in with an account that has administrator or *modify subdepartment course information* rights. See section 3.2.

**Procedures**

1. Select *Courses* from the menu bar.
2. Click *Add course*.
3. Fill in the required information for the new course.
4. Click *Save*.

**Likely errors**

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.
3.18 Edit course

Functional description

This tutorial describes how to add study programs in QIS.

Cautions and warnings

- You must be logged in with an account that has administrator or modify subdepartment course information rights. See section 3.2.

Procedures

1. Select Courses from the menu bar.
2. Locate the course you wish to edit and click on the left side of that row.
3. Edit the information you wish to modify.
4. Click Save.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.19 Remove course

Functional description

This tutorial describes how to remove courses.

Cautions and warnings

- You must be logged in with an account that has administrator or modify subdepartment course information rights. See section 3.2.

Procedures

1. Select Courses from the menu bar.
2. Locate the course you wish to remove and click on the left side of that row.
3. Click Yes, I’m sure.
Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.20 Add course instance

Functional description

This tutorial describes how to add course instances.

Cautions and warnings

- You must be logged in with an account that has *modify subdepartment course information* rights. See section 3.2.
- These course instances are added on a provisional basis. To make them definitive refer to section 3.23.

Procedures

1. Select *Courses* from the menu bar.
2. Locate the course you wish to add a course instance to and click + under *Credits*.
3. Fill in all the required information.
4. If any of the required fields does not contain the desired item you can add it by clicking + next to the drop down box:
   - A window will pop up.
   - Fill in all the required information.
   - Click *Save*.
   - Now select the item you just added.
5. Click *Save*

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.
3.21 Edit course instance

Functional description

This tutorial describes how to edit course instances.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment course information rights. See section 3.2.
- These modifications to course instances are on a provisional basis. To make them definitive refer to section 3.23.

Procedures

1. Select Courses from the menu bar.
2. Locate the course instance you wish to edit and click 🖋 under Periods.
3. Edit all the information you wish to modify.
4. Click Save

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.22 Remove course instance

Functional description

This tutorial describes how to remove course instances.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment course information rights. See section 3.2.
- These modifications to course instances are on a provisional basis. To make them definitive refer to section 3.23.
Procedures

1. Select Courses from the menu bar.
2. Locate the course instance you wish to remove and click ☓ under Periods.
3. Click Yes, I’m sure.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

3.23 Make courses instances definitive

Functional description

This tutorial describes how to make course instances definitive.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment course information rights. See section 3.2.

Procedures

1. Select either Courses or Programs from the menu bar.
2. Click Courses definitive.
3. Click Yes, I’m sure.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

3.24 Add education task

Functional description

This tutorial describes how to add education tasks.
Cautions and warnings

- You must be logged in with an account that has *modify subdepartment course information* rights. See section 3.2.
- Before you can assign employees to an education task, there should be a definitive version of it. Please refer to section 3.12 for assigning employees.

Procedures

1. Select *Courses* from the menu bar.
2. Locate the course instance you wish to add a task to and click + under *Periods*.
3. Fill in the required information.
4. Click Save.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.25 Edit education task

Functional description

This tutorial describes how to edit education tasks.

Cautions and warnings

- You must be logged in with an account that has *modify subdepartment course information* rights. See section 3.2.

Procedures

1. Select *Courses* from the menu bar.
2. Locate the course instance to which the task belongs you wish to edit and click  under *Periods*.
3. Locate the task you wish to edit and click ✍️ on that row.
4. Edit the information you wish to modify.
5. Click Save.
Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.26  Remove education task

Functional description

This tutorial describes how to remove education tasks.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment course information rights. See section 3.2.

Procedures

1. Select Courses from the menu bar.
2. Locate the course instance you wish to remove a task from and click under Periods.
3. Locate the task you wish to remove and click on that row.
4. Click Yes, I’m sure.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.27  Add non-course related task

Functional description

This tutorial describes how to add non-course related tasks.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment workload rights. See section 3.2.
Procedures

1. Select Tasks from the menu bar.
2. Click Add task.
3. Fill in the required information.
4. Click Save.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

3.28 Edit non-course related task

Functional description

This tutorial describes how to edit non-course related tasks.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment workload rights.
  See section 3.2.

Procedures

1. Select Tasks from the menu bar.
2. Locate the task you wish to edit and click on that row.
3. Edit the information you wish to modify.
4. Click Save.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.
3.29  Remove non-course related task

Functional description

This tutorial describes how to remove non-course related tasks.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment workload rights. See section 3.2.

Procedures

1. Select Tasks from the menu bar.
2. Locate the task you wish to remove and click on that row.
3. Click Yes, I’m sure.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.30  Add study program

Functional description

This tutorial describes how to add study programs in QIS.

Cautions and warnings

- You must be logged in with an account that has administrator or modify subdepartment course information rights. See section 3.2.

Procedures

1. Select Programs from the menu bar.
2. Click Add study program.
3. Fill in the required information for the new study program.
4. Click Save.
Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.31 Edit study program

Functional description

This tutorial describes how to edit study programs in QIS.

Cautions and warnings

- You must be logged in with an account that has administrator or modify subdepartment course information rights. See section 3.2

Procedures

1. Select Programs from the menu bar.
2. Locate the study program you wish to edit and click on that row.
3. Edit the information you wish to modify.
4. Click Save.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.32 Add target group to a study program

Functional description

This tutorial describes how to add target groups to study programs.

Cautions and warnings

- You must be logged in with an account that has modify subdepartment course information rights. See section 3.2
- A target group should only be linked to one study program.
Procedures

1. Select Programs from the menu bar.

2. Locate the study program you wish to add a target group to and click ➕ under Target groups.

3. Fill in all the required information.

4. If any of the required fields does not contain the desired item you can add it by clicking ➕ next to the drop down box:
   - A window will pop up.
   - Fill in all the required information.
   - Click Save.
   - Now select the item you just added.

5. Click Save.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.33 Remove target group from a study program

Functional description

This tutorial describes how to remove target groups from study programs.

Cautions and warnings

- You must be logged in with an account that has administrator or modify subdepartment course information rights. See section 3.2.

- It is not possible to remove just the association between a target group and a study program. It is only possible to completely remove a target group.

Procedures

1. Select Programs from the menu bar.

2. Locate the study program you wish to remove a target group from and click ➖ under Target groups.
3. Locate the target group you wish to remove and click ✗ on that row.
4. Click Yes, I’m sure.

**Likely errors**

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

### 3.34 Remove study program

**Functional description**

This tutorial describes how to remove study programs.

**Cautions and warnings**

- You must be logged in with an account that has administrator or modify subdepartment course information rights. See section 3.2

**Procedures**

1. Select Programs from the menu bar.
2. Locate the study program you wish to remove and click ✗ on that row.
3. Click Yes, I’m sure.

**Likely errors**

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

### 3.35 Add course instances to a target group

**Functional description**

This tutorial describes how to add course instances to target groups.
Cautions and warnings

- You must be logged in with an account that has *modify subdepartment course information* rights. See section 3.2.

Procedures

1. Select *Programs* from the menu bar.
2. Click *Expand study programs*.
3. Locate the target group you wish to add a course instance to and click + on that row under *Course instances*.
4. Select the course instances you wish to add in the *Available course instances* box and click on the blue arrow.
5. Click *Save*.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.36 Remove course instances from a target group

Functional description

This tutorial describes how to remove course instances from target groups.

Cautions and warnings

- You must be logged in with an account that has administrator or *modify subdepartment course information* rights. See section 3.2.

Procedures

1. Select *Programs* from the menu bar.
2. Click *Expand study programs*.
3. Locate the target group you wish to remove a course instance from and click + on that row under *Course instances*.
4. Select the course instances you wish to remove in the *Chosen course instances* box and click .
5. Click Save.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.37 Add administrative object

Functional description

This tutorial describes how to add an object to QIS, that is used for administrative purposes. For example departments or periods in a year. These objects aren’t likely to change much and are therefore grouped together in a single page.

Cautions and warnings

- You must be logged in with an account that has administrator rights. See section 3.2.

Procedures

1. Select Administrative from the menu bar.
2. Click + next to the object type you wish to add.
3. Fill in the required information.
4. Click Save.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.38 Edit administrative object

Functional description

This tutorial describes how to edit an object to QIS, which is used for administrative purposes. For example departments or periods in a year. These objects aren’t likely to change much and are therefore grouped together in a single page.
Cautions and warnings

- You must be logged in with an account that has administrator rights. See section 3.2
- When editing Rights or Rightsets, be careful not to remove your own ability to do so.

Procedures

1. Select Administrative from the menu bar.
2. Click next to the object type you wish to edit.
3. Click on the object you wish to edit.
4. Edit the information you wish to modify.
5. Click Save.

Likely errors

The most likely errors are addressed in the interface.
Please take notice of the cautions and warnings.

3.39 Remove administrative object

Functional description

This tutorial describes how to remove an object from QIS, which is used for administrative purposes. For example departments or periods in a year. These objects aren’t likely to change much and are therefore grouped together in a single page.

Cautions and warnings

- You must be logged in with an account that has administrator rights. See section 3.2
- When removing Rights or Rightsets, be careful not to remove your own ability to do so.

Procedures

1. Select Administrative from the menu bar.
2. Click on the object type you wish to remove.
3. Check the boxes next to the objects you wish to remove.
4. Select Delete selected items from the drop down box.
3.40 Close subdepartment

**Functional description**

This tutorial describes how to close a year of a subdepartment in QIS.

**Cautions and warnings**

- You must be logged in with an account that has administrator or *modify subdepartment workload* rights. See section 3.2.

**Procedures**

1. Select *Administrative* from the menu bar.
2. Click on *Subdepartments*.
3. Click on the subdepartment you wish to close.
4. Click *Close year*.
5. Click *Yes, I’m sure*.

**Likely errors**

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.41 Copy system year

**Functional description**

This tutorial describes how to copy information from an old system year to a new one in QIS.
Cautions and warnings

- You must be logged in with an account that has administrator or modify subdepartment workload rights. See section 3.2.
- You can only copy information to an empty year. Only use this option when creating a new year.

Procedures

1. Select Administrative from the menu bar.
2. Click on System years.
3. Click Add system year.
4. Fill in the required information.
5. Select a year to copy from.
6. Click Save.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.42 Enabling NT-connection

Functional description

This tutorial describes how to enable the connection to the NT-login system of the university.

Cautions and warnings

- You must be logged in with an account that has administrator rights. See section 3.2.

Procedures

1. Select Administrative from the menu bar.
2. Click on External connections.
3. Click Enable.
Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

### 3.43 Disable NT-connection

#### Functional description

This tutorial describes how to disable the connection to the NT-login system of the university.

#### Cautions and warnings

- You must be logged in with an account that has administrator rights. See section 3.2

#### Procedures

1. Select Administrative from the menu bar.
2. Click on External connections.
3. Click Disable or Enable.

#### Likely errors

If the NT system is unavailable but still enabled, no user will be able to log in, except for the superuser created during installation.

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

### 3.44 Reports

#### Functional description

This tutorial describes how to view the reports generated by QIS.

#### Cautions and warnings

- You must be logged in. See section 3.2
Procedures

1. Select Reports from the menu bar.
2. Click the View button next to the report you wish to see.

Likely errors

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.

3.45 Export report as comma separated value file

Functional description

This tutorial describes how to export the reports generated by QIS into CSV.

Cautions and warnings

- You must be logged in. See section 3.2

Procedures

1. Navigate to the report you wish to export.
2. Click Export as CSV.

Likely errors

Using Microsoft Excel, you may have to import instead of opening the CSV file.

The most likely errors are addressed in the interface. Please take notice of the cautions and warnings.
Chapter 4

Reference

Because the administration interface is hosted on a web server there are certain errors which can occur. For example, your internet connection could be down. In that case you have to repair your internet connection before you can continue. Another error which can occur, is that either the internet connection of the server is down, or the software running the website has stopped. When you cannot connect to the QIS interface and you are sure your internet connection is up, you can contact an operator. In this reference we will assume that there are no problems with the internet connection. If there are connection problems, these need to be fixed before you can consult this reference.

For most of the references in this chapter the possible errors section is omitted. If the error is ‘expected’, for instance an error is made with duplicate entries in the database, the on screen display will guide you through the possible solutions. If the error is ‘unexpected’ and is not covered in appendix A, contact an administrator.

4.1 Login view

4.1.1 Functional description

In this view you can log in to the QIS interface. When you have administration rights you can do this to for example to manage accounts, employees and tasks. Otherwise, you can log in to view your own workload data.

4.1.2 Cautions and warnings

1. User names are unique in the system.
4.1.3 Formal description

In the login view you have to enter your user name and password, which are the parameters required for this view in order to log in. Default the user name and password are left blank.

4.1.4 Related operations

</table>

4.2 Menu bar

4.2.1 Functional description

At the top of almost every view, you will find the menu bar. This is a very simple bar usable for easy navigation through QIS.

4.2.2 Cautions and warnings

1. You must be logged in to see this view.
2. Not all buttons described may be available, depending on your user rights within QIS.

4.2.3 Formal description

In the menu bar you will find year-navigation buttons at the right. There you will also find the log out button. For user with more rights there will also be buttons to manage courses, employees, tasks etc.

</tbody>
</table>

4.22 Add / Change Administrative Object view

4.22.1 Functional description

This section describes the Add / Change Administrative Object view. This is used for adding administrative objects and modifying details of an administrative object.

4.22.2 Cautions and warnings

1. You must be logged in to see this view.
2. This view may not be available if you do not have the permissions to change the specified administrative object.
3. The Close year button is only available when the specified administrative object is a subdepartment.

4. The Copy from year combo box is only available when the specified administrative object is a system year. The combo box also only has effect when the system year has not been created, i.e. when creating a new year.

### 4.22.3 Formal description

In this view you can change the data for a specific administrative object. The specific fields displayed in this view correspond to the type of administrative object the view is intended for.

### 4.22.4 Related operations

<table>
<thead>
<tr>
<th>Operation</th>

<tr>
<td>Related object rows</td>
<td>Fill in the fields in these rows to change objects related to this administrative object, or to add a new one.</td>
<td>None.</td>
</tr>
<tr>
<td>Close year button</td>
<td>Press this button if you want to mark all data for this subdepartment in the current year as definitive.</td>
<td>All data in the current year for this subdepartment is marked as definitive and the current year is closed, meaning it cannot be edited anymore.</td>
</tr>
<tr>
<td>Copy from year combo box</td>
<td>Press this button if you want to copy data regarding course instances, employments and workload to this system year.</td>
<td>If the system year is saved, all data regarding course instances, employments and workload are copied from the system year specified in Copy from year to this system year. This only works if this system year has nog been saved yet. When Copy from year is left blank, no data is copied at all.</td>
</tr>
</tbody>
</table>

### 4.23 External connections view

#### 4.23.1 Functional description

This view allows an administrator to change the settings of the external connections of QIS.

#### 4.23.2 Cautions and warning

1. You must be logged in to see this view.
2. This view may not be available at all if you do not have the permissions to view it.
3. Changing the state of connectors drastically influences the way QIS works.

4.23.3 Formal description

On this view you can change whether or not the NT-login system of the university is used when authenticating.

4.23.4 Related operations

<table>
<thead>
<tr>
<th>Operation</th>
<th>Description</th>
<th>Result</th>

<td>Press this button to export the report as a CSV file</td>
<td>The report will be offered for download as a CSV file.</td>
</tr>
</tbody>
</table>
Appendix A

Error messages and recovery procedures

A.1 permission denied

User

If you encounter a 403 or a permission denied error, contact an administrator of QIS.

Administrator

Please refer to section 3.37 or 3.38 for granting and changing rights to employees.

A.2 server error

User

If you encounter a 500 or a internal server error, contact an administrator.

A.3 Please enter a correct username and password

User

- Most likely, you entered your username or password incorrectly. Please try to fill it in again.
- If you are sure you entered your username and password correctly, probably the NT system is unavailable.
  The first time you try to log in when the NT system is unavailable, a password is sent to you by email.
Use this password instead, until the NT system is available again. If you lose this password, you cannot login until the NT system is available again.

- If you do not receive an email containing a password and you have never received it before, contact an administrator of QIS.

**Administrator**

- Please follow the steps in the User section above first.
- Passwords of users cannot be recovered nor reset.
- If the NT system is unavailable, no one is able to log in. To disable the NT system, please log in as the superuser created during installation and refer to section \[3.43\]
