Handbook of Research on Business Process Modeling

Edited by: Jorge Cardoso, SAP Research, Germany and Wil van der Aalst, Technische Universitat Eindhoven, The Netherlands

13-digit ISBN: 978-1-60566-288-6

634 pages; 2009 Copyright

Price: US \$265.00 (hardcover*)

Perpetual Access: US \$400.00

Print + Perpetual Access: US \$530.00

Illustrations: figures, tables (8 1/2" x 11")

Translation Rights: World

*Paperback is not available.

Business managers are striving to move toward process-centric organizations, but the challenge remains in ensuring adoption of a business process culture.

“This book provides valuable answers to frequent problems that people in both academia and industry commonly face when studying and executing BPM undertakings. In each chapter a key concern of business process modeling is discussed.”

- Jorge Cardoso, SAP Research, Germany

The Handbook of Research on Business Process Modeling aids managers in the transformation of organizations into world-class competitors through business process applications. A useful resource for business leaders, field researchers, and academicians in management, this reference book contains a repository to the most relevant and up-to-date information on business process modeling.

Subject:

Business Information Systems; Software/Systems Design; Competitive Intelligence; Electronic Business

Market:

This cutting-edge publication will be invaluable to academic, research, and corporate libraries as well as those seeking resources in business information systems and process modeling. Researchers, students, and educators in the fields of software development, system design, business administration, systems analysis and IT project management will find this resource provides comprehensive coverage of the principles and best practices of business process modeling.

Excellent addition to your library! Recommend to your acquisitions librarian.

Handbook of Research on Business Process Modeling

Edited by: **Jorge Cardoso, SAP Research, Germany and Wil van der Aalst, Technische Universitat Eindhoven, The Netherlands**

Table of Contents

Section I: Advanced Modeling Methodologies

Chapter I: Business Process Modelling in the jABC: The One-Thing-Approach

Tiziana Margaria, Universität Potsdam, Germany
Bernhard Steffen, TU Dortmund, Germany

Chapter II: Modeling Process-Driven SOAs – a View-Based Approach

Huy Tran, Vienna University of Technology, Austria
Ta'ïd Holmes, Vienna University of Technology, Austria
Uwe Zdun, Vienna University of Technology, Austria
Schahram Dustdar, Vienna University of Technology, Austria

Chapter III: Process Modeling for Holistic Process Management

Stefan Jablonski, University of Bayreuth, Germany

Section II: Modern Business Process Languages

Chapter IV: The Dichotomy of Modeling and Execution - BPMN and WS-BPEL

Matthias Kloppmann, IBM Deutschland Research and Development GmbH, Germany
Dieter König, IBM Deutschland Research and Development GmbH, Germany
Simon Moser, IBM Deutschland Research and Development GmbH, Germany

Chapter V: Yet Another Workflow Language: Concepts, Tool Support and Application

Arthur ter Hofstede, Queensland University of Technology, Australia
Michael Adams, Queensland University of Technology, Australia
Chun Ouyang, Queensland University of Technology, Australia

Chapter VI: Modeling Constructs

Ekkart Kindler, Denmark's Technical University, Denmark
Chapter VII: ICN-based Workflow Model and Its Advances
Kwanghoon Kim, Kyonggi University, South Korea
Clarence A. Ellis, University of Colorado at Boulder, USA

Section III: Process Models in Dynamic Environments

Chapter VIII: Enabling Adaptive Process-Aware Information Systems with ADEPT₂

Manfred Reichert, University of Ulm, Germany
Peter Dadam, University of Ulm, Germany

Chapter IX: Modeling Business Process Variability for Design-Time Configuration

Marcello La Rosa, Queensland University of Technology, Australia
Marlon Dumas, University of Tartu, Estonia
Arthur H.M. Hofstede, Queensland University of Technology, Australia

Chapter X: Design of Repairable Processes

Cinzia Cappiello, Politecnico di Milano, Italy
Barbara Pernici, Politecnico di Milano, Italy

Chapter XI: Web Process Adaptation

Kunal Verma, Accenture Technology Labs, USA

Section IV: Enriching Process Models and Enactment Architectures

Chapter XII: Temporalities for Workflow Management Systems

Carlo Combi, Università degli Studi di Verona, Italy

Giuseppe Pozzi, Politecnico di Milano, Italy

Chapter XIII: The People Integration Challenge

Karsten Ploesser, SAP Research CEC, Australia
Nick Russell, Technische Universiteit Eindhoven, The Netherlands

Chapter XIV: Semantic Business Process Management: Applying Ontologies in BPM

Dimka Karastoyanova, University of Stuttgart, Germany
Tammo van Lessen, University of Stuttgart, Germany
Frank Leymann, University of Stuttgart, Germany
Zhilei Ma, University of Stuttgart, Germany
Jörg Nitzsche, University of Stuttgart, Germany
Branimir Wetzstein, University of Stuttgart, Germany

Chapter XV: Compiling Business Process Models into Executable Code

Cesare Pautasso, University of Lugano, Switzerland

Chapter XVI: Using WfMS to Support Unstructured Activities

Hernâni Mourão, Polytechnic Institute of Setúbal, Portugal
Pedro Antunes, University of Lisboa, Portugal

Section V: Business Process Management In Organizations

Chapter XVII: Business Process Engineering

Guillermo Jimenez, Tecnológico de Monterrey, Mexico
Chapter XVIII: B2B and EAI with Business Process Management

Christoph Bussler, Merced Systems Inc., USA

Chapter XIX: Systems for Interorganizational Business Process Management

Paul Grefen, Eindhoven University of Technology, The Netherlands

Chapter XX: The Journey to Business Process Compliance

Guido Governatori, Queensland Research Laboratory, Australia
Shazia Sadiq, The University of Queensland, Australia

Section VI: Improving Business Processes

Chapter XXI: Business Process Intelligence

M. Castellanos, Hewlett-Packard Laboratories, USA

A. Alves de Medeiros, Eindhoven University of Technology, The Netherlands

J. Mendling, Queensland University of Technology, Australia

B. Weber, University of Innsbruck, Austria

A.J.M.M. Weijters, Eindhoven University of Technology, Netherlands

Chapter XXII: Applied Sequence Clustering Techniques for Process Mining

Diogo R. Ferreira, IST – Technical University of Lisbon, Portugal

Chapter XXIII: A Data-Centric Design Methodology for Business Processes

Kamal Bhattacharya, IBM T.J. Watson Research Lab, USA

Richard Hull, IBM T.J. Watson Research Lab, USA

Jianwen Su, University of California at Santa Barbara, USA

Chapter XXIV: Measurement and Maturity of Business Processes

Laura Sanchez, University of Castilla-La Mancha, Spain

Andrea Delgado, University of Castilla-La Mancha, Spain

Francisco Ruiz, Universidad de la República, Spain

Félix García, University of Castilla-La Mancha, Spain

Mario Piattini, University of Castilla-La Mancha, Spain

About the Editors:

Jorge Cardoso joined SAP Research (Germany) in 2007. He is also professor at the University of Madeira (Portugal) and the director of the SEED Laboratory. He previously gave lectures at the University of Georgia (USA) and at the Instituto Politécnico de Leiria (Portugal). Dr. Cardoso received his PhD in computer science from the University of Georgia (2002). While at the University of Georgia, he was part of the LSDIS Lab. where he did extensive research on workflow management systems. In 1999, he worked at the Boeing Company on enterprise application integration. Dr. Cardoso was the organizer of several international conferences on semantic Web and information systems. He has published over 80 refereed papers in the areas of workflow management systems, semantic Web, and related fields. He has also edited 3 books on semantic Web and Web services. He is on the editorial board of the *Enterprise Information Systems Journal*, the *International Journal on Semantic Web and Information Systems*, and the *International Journal of Information Technology*. He is also member of the Editorial Advisory Review Board of IGI Global. Prior to joining the University of Georgia, he worked for two years at CCG, Zentrum für Graphische Datenverarbeitung, where he did research on Computer Supported Cooperative Work.

Wil van der Aalst is a full professor of information systems at the Technische Universiteit Eindhoven (the Netherlands). Currently he is also an adjunct professor at Queensland University of Technology (Australia) working within the BPM group there. His research interests include workflow management, process mining, Petri nets, business process management, process modeling, and process analysis. Wil van der Aalst has published more than 70 journal papers, 12 books (as author or editor), 200 refereed conference publications, and 20 book chapters. He has been a co-chair of many conferences including the International Conference on Cooperative Information Systems, the International Conference on the Application and Theory of Petri Nets, and the Business Process Management Conference, and is an editor/member of the editorial board of several journals, including the *Business Process Management Journal*, the *International Journal of Business Process Integration and Management*, the *International Journal on Enterprise Modelling and Information Systems Architectures*, and *Computers in Industry*.
