

Name of the BPM Use Case Proposed:

Short description of the BPM Use Case: (100 words)

.....
.....
.....
.....

Graphical description of the BPM Use Case:

If possible use the following symbols, but of course add symbols when needed.

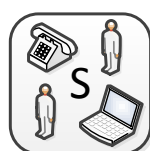

human

model
D=descriptive
N=normative
E=executable

configurable
model

information
system

event
data

diagnostics

collection of
models

See also Vision file: <http://wwwis.win.tue.nl/~wvdaalst/etc/BPM-Use-Cases/20-use-cases.vsd>

Relation to other uses cases:

Think of “part of” and “specialization” relationships among uses cases. For example, a new use case “Performance Analysis Using Simulation” is a specialization of the existing use case “Analyze Performance Based on Model” (PerfM). Also see the composite uses cases in <http://dx.doi.org/10.1155/2013/507984>.
